

Free Threat Intelligence Tools

Threat Feeds & Platforms

1. AlienVault OTX (Open Threat Exchange)

- Community-driven TI sharing platform.
- Provides **pulses** (collections of IoCs like IPs, hashes, domains).
- Website: otx.alienvault.com

2. MISP (Malware Information Sharing Platform)

- Open-source TI platform.
- Helps organizations share IoCs internally and externally.
- Best for SOC labs.

3. Abuse.ch Projects

- Offers free IoCs related to malware, botnets, and C2 servers.
- Examples: **URLhaus**, **Feodo Tracker**, **MalwareBazaar**.
- Website: abuse.ch

4. VirusTotal (Free Version)

- Online scanner for files and URLs.
- Provides threat reputation and IoCs.

OSINT & Investigation Tools

5. Shodan (Free Limited Version)

- Search engine for internet-connected devices.
- Helps discover exposed services and vulnerable systems.

6. Censys

- Similar to Shodan, for scanning exposed assets.

7. Maltego CE (Community Edition)

- Graph-based OSINT tool.

- Useful for mapping threat actors, domains, and infrastructure.

8. Google Dorks / Hunter.io / Whois

- Helps gather domain & email intelligence.

Analysis Tools

9. Hybrid Analysis (by CrowdStrike)

- Free online malware sandbox.
- Upload suspicious files/URLs → get behavioral analysis.

10. Any.Run (Free Version)

- Interactive sandbox for malware analysis.
- Good for training SOC analysts.

11. Cuckoo Sandbox (Self-hosted)

- Open-source automated malware analysis.

Threat Intelligence Feeds (for SIEM/SOC Integration)

12. STIX/TAXII Feeds

- Standardized TI feeds (many free sources available).
- Example: MITRE ATT&CK data via TAXII.

13. Spamhaus

- Provides blacklists of spam/malicious domains and IPs.

14. PhishTank

- Free community database of phishing URLs.

15. Cisco Talos Intelligence

- Free TI on malware, vulnerabilities, and campaigns.
