

What is Google Dorking?

Google Dorking is the practice of using **advanced Google search operators** to find specific types of information that are not easily visible through regular search. It's often used in ethical hacking and OSINT to find:

- Exposed files (PDF, XLS, etc.)
- Login pages
- Email addresses
- Configuration or backup files
- Security vulnerabilities

Ethical hackers use Google Dorking for **authorized security assessments** only. Misuse may be illegal.

Common Google Dork Operators

Operator Purpose

Example

site:	Search within a specific website/domain	site:example.com
filetype:	Find specific file types	filetype:pdf site:example.com
intitle:	Search in the title of web pages	intitle:login
inurl:	Search in the URL	inurl:admin
intext:	Search in the page content	intext:\"confidential\"
ext:	Same as filetype (extension of file)	ext:xls
cache:	Shows cached version of a site	cache:example.com
link:	Lists pages that link to a specific URL	link:example.com
related:	Finds sites similar to a given one	related:amazon.com
allintitle:	All words must be in the page title	allintitle:admin login
allinurl:	All words must be in the URL	allinurl:admin login

Google Dorking Examples

Goal

Dorking Query Example

Find Login Pages

inurl:admin login or intitle:login page

	Find Exposed Files	site:example.com filetype:pdf confidential
	Find Excel Docs	filetype:xls site:gov.in
	View Index Pages	intitle:index.of site:example.com
	Find Exposed Passwords	intext:password filetype:txt
	Find Emails	site:example.com intext:@example.com
	Find Backup Files	intitle:index.of backup or `ext:bak
	Find Database Dumps	filetype:sql intext:insert into
	Find Firewalls or Cams Info	intitle:\"webcam XP\" or inurl:view/index.shtml
	Find WordPress Login	inurl:wp-login.php or intitle:Welcome to WordPress
	Find Apache Configs	filetype:conf intext:ServerAdmin

Example Explained

site:example.com filetype:pdf confidential

- **site:example.com** = search only on this domain
- **filetype:pdf** = show only PDF files
- **confidential** = search pages containing the word “confidential”

This would list all PDF files on the website example.com that contain the word “confidential.”

Tips for Google Dorking

- Always use **quotes** "" to force exact matches.
- Combine multiple operators for **focused results**.
- Use **OR** and **-** to include/exclude terms:
 - inurl:admin OR login
 - site:example.com -inurl:login
